Atty. Dkt. 720734.00002 Preliminary Amendment Page 2

AMENDMENT TO THE CLAIMS:

Please amend claims 1-8 as follows:

- (Currently Amended) A method for packing objects
   (14), having the following method steps:
- 1.1 arranging the objects (14) are arranged
  individually in a row one behind the other,
- $\frac{1.2}{1.2}$  from the start of the row onward, moving the objects (14) are moved onto a band (9),
- $\frac{1.3}{4}$  winding up the band (9) is wound up such that the objects (14) are enclosed between two layers of the band (9).
- 2. (Original) The method as claimed in claim 1, wherein the objects (14) are spaced apart one behind the other.
- 3. (Currently Amended) The method as claimed in claim 1 or 2, wherein the band (9, 10) is wound up under tensioning.
- 4. (Currently Amended) The method as claimed in <u>claim 1</u> one of the preceding claims, wherein a single band (9) is used.
- 5. (Currently Amended) The method as claimed in claim 1 one of claims 1 to 3, wherein the objects (14) are secured between two bands (9, 10).
- 6. (Currently Amended) The method as claimed in claim 1 one of the preceding claims, wherein use is made of a band (9, 10) which is wider than the objects (14).
- 7. (Currently Amended) The method as claimed in claim 1 one of the preceding claims, wherein the band (9, 10) is, or the two bands are, wound up onto a core (3).
- 8. (Currently Amended) A device for packing

objects (14), having

8.1 a holder for accommodating an unwinding-up reel (7,8) for a band (9, 10),

8.2 a holder for accommodating a winding-up reel (1) for the band (9, 10),

8.3 a drive for rotating the winding-up reel (1), it being the case that

- 8.4 a band section leading from the circumference of the unwinding reel (7) to the circumference of the winding-up reel (1) remains free for accommodating an object (14).
- 9. (Original) The device as claimed in claim 8, having a support for the accommodating section of the band (9), this support changing its position as the diameter of the band roll on the winding-up reel (11) at any one time changes.
- 10. (Original) The device as claimed in claim 8 or 9, having a deflecting roller (11) between the unwinding reel (7) and the winding-up reel (1).
- 11. (Original) The device as claimed in claim 10, wherein the accommodating section (13) is arranged downstream of the deflecting roller (11), as seen in the transporting direction of the wound-up and.
- 12. (Currently Amended) The device as claimed in <u>claim 8</u> one of claims 8 to 11, having a mount for a second unwinding reel (8), a band (10) which leads from this reel (8) to the winding-up reel (1) being arranged on the accommodating side of the first band (9).
- 13. (Original) The device as claimed in claim 12, having a deflecting roller (12) for the second band (10).
- 14. (Currently Amended) The device as claimed in claim 8 one of claims 8 to 13, having a means for producing and/or maintaining tensioning at least in the

first band (9) between the winding-up reel (1) and the unwinding reel (7).

- 15. (Currently Amended) The device as claimed in claim 8 one of claims 8 to 14, wherein the supply location (13) for the objects (14) is arranged in an essentially horizontally running manner.
- 16. (Original) A packing unit containing a band roll, between the turns of which objects (14) are secured under tensioning, the objects (14) preferably being narrower than the band roll.
- 17. (Original) Use of a packing unit as claimed in claim 16 as an interim store for objects (14) between the various stages of a production process.
